WORK EXPERIENCE

Grim's Haunted House

Higganum, CT 06441

Prop Technician

Oct 2017 - Oct 2021

- Designed and built interactive props using pneumatics and electronics to achieve immersive experiences.
- Engineered plug-and-play prop systems that allowed non-technical users to set up props more easily.
- Diagnosed and repaired hardware and software issues on-site to maintain performance during live installations.

Olive Garden

3111 E Colonial Dr, Orlando, FL 32803

Host

Nov 2023 - Jun 2025

- Coordinated guest seating between four hosts, monitored table availability, and streamlined guest flow.
- Collaborated with servers about table assignments, guest inquiries, and additional support as needed.
- Engaged with guests to answer questions, take reservations, and address concerns, ensuring customer satisfaction.

Server

Jul 2024 - Dec 2024

- Provided high-quality service by efficiently managing multiple tables and coordinating meal pacing.
- Collaborated with coworkers by running food, greeting guests, and ensuring smooth service flow.
- Adapted quickly to changing priorities during peak hours and balancing guest needs with service responsibilities.

EDUCATION

Full Sail University

Winter Park, FL

Bachelor of Science in Game Development

Graduation Date: Feb 2025

PROJECT EXPERIENCE

Hollow End

Winter Park, FL

UI and UX Programmer (Unreal Engine)

Nov 2024 - Feb 2025

- Designed and implemented game menus and HUD elements.
- Created an inventory system categorizing player upgrades into three sections, allowing item dropping, and displaying upgrade descriptions and stat modifications.
- Engineered a save system for player settings with extendable functionality for team integration.

Venture Time

Winter Park, FL

Graphics and Gameplay Programmer (Custom Renderer)

Jun 2024 - Jul 2024

- Converted a 2D spaceship game made in Vulkan to a 3D dungeon-crawler game using DirectX 11.
- Gave a hand in developing player movement and implemented collectible interactions as a win condition.
- Designed a collision detection system for player-to-enemy interactions and object interactions.
